

TO-17 Continuum

A Solution for your VOC & SVOC needs

The Benefits

- Single media type can capture compounds from multiple methods
- Custom Method Development Provided
- Consulting Services Available

A viable option for:

Risk Assessment – Vapor Intrusion & Brownfields

- Indoor air and/or soil gas application
- Standard TO-15 + light end PAHs with low action levels achievable

UST – fuel characterization and remediation

- Soil gas/SVE applications
- Petroleum related compounds, gas and diesel range, possibly heavier

MGP – monitoring at former MGP sites

- Ambient air and soil gas applications
- BTEX and light end PAHs, including Naphthalene
- Single, cost effective sampling apparatus

LEEDs – green building certification of indoor air

- Indoor air application
- 4-PCH (carpet glue) and Total VOCs ref. to Toluene

Partner with Air Toxics' experience and expertise for a successful vapor sampling event. For a price quote or to setup your next sampling event, contact your Account Manager Alicia Sullivan at (800) 985-5955 x1012 or a.sullivan@airtoxics.com.

Always Air, Always Accurate
